

CONTENT MANAGEMENT

Customize your library portal

Multi-Lingual user interface

A variety of languages is currently available, and the list is growing.

ERM

We understand that the ability to manage electronic resources is important for librarians and administrators, and that's why we provide you an easy to use and efficient workflow in order to manage several aspects of your electronic subscriptions and trials

You can subscribe to new databases, adjust authentication settings and customize the list of your resources, all within the integrated ERM module

Customization options

Powerful customization tools that let you manage content, media galleries and chose from a wide range of themes and user interfaces

Media

Link to your videos, upload photo galleries and much more with the media and content modules

Multi-lingual CMS

The integrated content management system is not only easy to use but it also provides you the flexibility to publish content in different languages and map it to the enabled languages on your portal. You can have library service forms, surveys, news and announcements, events and even RSS feeds published in different languages at the same time.

Training Sessions

The workflow is fully integrated in the e-library portal. Execute your training plan, schedule sessions and webinars based on what your users need, and publish/submit calendar events in a few clicks, and review attendance and feedback in real-time.

Dedicated File Repository

You have the ability to upload all types of files, make them available to visitors and/or registered users and track down the download statistics as well

Thanks to our distributed content delivery network (D-CDN), the download time will always be fast no matter how many concurrent visitors or users you have
